## EDUCATION

- **Master of Computer Applications (MCA)** — Pimpri Chinchwad University | Aug 2024 – June 2026 | CGPA 8.4
- **Bachelor of Computer Applications (BCA)** — The New College, Kolhapur | July 2021 – May 2024 | CGPA 8.3

## TECHNICAL SKILLS

- **Frontend Development:** React.js, React Native, HTML5, CSS3, Tailwind CSS, React Hooks, Responsive UI Development
- **Backend Development:** Node.js, Java, Spring Boot, Python, FastAPI, REST API Development
- **Databases:** Microsoft SQL Server, MongoDB, MySQL
- **AI & Generative AI:** GPT API Integration, LLM-based Applications, Generative AI
- **Tools & Platforms:** Git, GitHub, Postman, VS Code, Docker, AWS
- **Development Practices:** API Integration, Debugging, Performance Optimization, Testing, Code Reviews, Agile/Scrum

## PROFESSIONAL EXPERIENCE

**Full Stack Developer — VMV Tech Solutions Pvt Ltd** ***June 2025 – June 2026***

- Developed and maintained web application features using **React.js, JavaScript, REST APIs, and SQL,** building reusable components and responsive user interfaces.
- Worked on frontend-backend integration, requirement analysis, debugging, and production issue resolution in collaboration with Business Analysts and QA teams.
- Gained hands-on experience across the software development lifecycle, including testing, performance optimization, code reviews, and Agile development practices.

## KEY PROJECTS

**RentOware - Fashion Subscription Platform** **VMV TechSolutions Pvt Ltd**

***React.js, React Native, TypeScript, SQL Server, REST APIs***

- **Developed responsive customer interfaces** for product browsing, subscription selection, rental orders, and delivery tracking.
- Built dashboards covering **5+ management areas**, including products, plans, orders, inventory, and delivery agents.
- Integrated frontend components with **Express.js REST APIs and SQL** Server, supporting end-to-end data flow and weekly delivery scheduling.

**AI-Powered LinkedIn Post Generator | React.js, Python, GPT API, Generative AI, LLMs**

- Developed an AI-powered application that generates structured **LinkedIn posts based on user-provided topics.**
- Built an interactive React.js interface to collect user inputs and display AI-generated content.
- Integrated GPT API capabilities to generate relevant content through application API communication.

**Festora — College Cultural Event Management Platform** **Pimpri Chinchwad University**

***Python, FastAPI, React.js, MongoDB, JWT, Postman***

- Developed React interfaces for event creation, registration, and event management.
- Integrated REST APIs to connect frontend workflows with backend services and application data.
- Built dashboard interfaces to display event statistics and support event administration.

## CERTIFICATIONS & ACHIEVEMENTS

- IIIC Volunteer — Pimpri Chinchwad University
- Participant, Samsung Innovation Campus Programme
- Fundamentals of Software Engineering — IBM
