Profile

GenAI-enthusiast Software Developer with 1+ year of software development experience and strong project exposure in **Generative AI, NLP, and Machine Learning**. Built academic and personal projects involving **LLM-based applications, Retrieval-Augmented Generation (RAG), embeddings, semantic search, and prompt engineering** using Python, FastAPI, and React.js. Strong foundation in **Python, PyTorch, scikit-learn, REST APIs, Docker, AWS fundamentals, software architecture, debugging, and Agile SDLC**, with a strong interest in building scalable AI-powered applications and developing expertise in modern GenAI and MLOps technologies.

Technical Skills

Generative AI & LLM: Generative AI, Large Language Models (LLMs), Prompt Engineering, LLM API Integration, RAG, Embeddings, Semantic Search

AI / Machine Learning: Python, Machine Learning Fundamentals, NLP Fundamentals, Pandas, NumPy, scikit-learn, Model Evaluation

AI Application Development: FastAPI, REST APIs, Document Processing, Text Chunking, Vector Similarity Search, API Integration

Programming: Python, Java, JavaScript, TypeScript, SQL

Frontend: React.js, React Native, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Vite

Databases: MongoDB, MySQL, SQL Server, PostgreSQL

Cloud & MLOps: AWS, Docker, CI/CD Fundamentals, API Deployment Fundamentals

Tools: Git, GitHub, Postman, Maven, VS Code

Engineering Concepts: Software Architecture, OOP, SDLC, Agile/Scrum, Debugging, Authentication, API Design, Performance Optimization

Languages

English: Professional | **Hindi:** Professional | **Marathi:** Native | **Japanese:** Beginner (Preparing for JLPT N5)

Professional Experience

VMV Tech Solutions

June 2025 – June 2026

Full Stack Developer

- Developed and maintained full-stack applications using **Python, Java, React.js, REST APIs, SQL, and MongoDB** across application development and integration workflows.
- Developed backend services and REST APIs for business logic, data processing, validation, database operations, and frontend-backend integration.
- Built reusable React.js components and integrated application interfaces with backend APIs to deliver responsive and data-driven user workflows.
- Performed application debugging, API testing, database validation, error handling, and performance improvements across frontend and backend layers.
- Used **Git, Postman, Maven and Agile development** practices for version control, API validation, application testing, and software delivery.
- Applied software design, authentication, validation, and exception handling practices to improve application reliability and maintainability.

Projects

GenAI Knowledge Assistant

Python / FastAPI / LLM API / RAG / Embeddings / Vector Database

- Built a **Generative AI knowledge assistant** that processes uploaded documents and generates context-grounded answers using LLM-based question answering and Retrieval-Augmented Generation (RAG).
- Implemented document ingestion, text preprocessing, chunking, embedding generation, semantic retrieval, prompt construction, and context-aware response generation.
- Developed **FastAPI REST endpoints** for document processing and question-answering workflows and integrated an LLM API for response generation.
- Evaluated generated responses for relevance and factual consistency and refined prompts and retrieval context to reduce unsupported responses.

Festora – University Cultural Event Management Platform

GitHub

ReactJS / FastAPI / MongoDB / Python / JWT / REST APIs

- Developed a full-stack event management platform with **React.js, REST APIs, Python, and MongoDB** for

event and user management workflows.

- Implemented reusable frontend components, API-driven workflows, validation, authentication, database operations, and exception handling.
- Applied layered application design and debugging practices to improve maintainability, reliability, and functional delivery.

CareCrop – Plant Disease Detection System

Python / PyTorch / OpenCV / Machine Learning

- Developed an image classification system to identify plant diseases using **Python, PyTorch, image preprocessing, and deep learning techniques**.
- Implemented data preprocessing, dataset preparation, model training, validation, prediction, and performance evaluation.
- Analyzed model predictions using classification metrics and integrated the trained model into an application for inference.

Education

Master of Computer Applications (MCA)

Pimpri Chinchwad University, Pune

Aug 2024 – June 2026

CGPA: 8.4

Bachelor of Computer Applications (BCA)

The New College, Kolhapur

Aug 2021 – June 2024

CGPA: 8.3

Certifications

- Generative AI Fundamentals by IBM
- Introduction to Software Engineering by IBM
